PharmaLex

Harnessing the value of  
your data through data-  
and-analytics innovation

# Our vision: data-and-analytics transformation

Experience the power of data-and-analytics seamlessly woven into every phase of your journey, from discovery to market access. At PharmaLex, we redefine possibilities with our innovative approach to data strategy and quantitative sciences.

## **The PharmaLex advantage: uniting strategy and science**

Step into a world where data strategy meets quantitative sciences, igniting impactful digitalization and accelerating development. From discovery to clinical development, CMC development, and market access, we help mitigate risks and empower decisions with confidence.

## **Driving innovation across therapeutic areas**

Embark on a transformative journey across disease landscapes with our seasoned team. With extensive experience in a broad range of therapeutic areas, including oncology, cardiovascular, central nervous system, gastro-intestinal, musculoskeletal, endocrine, dermatology, sensory organs and more, we put data and results into scientific context and help drive decisions and next steps.

## **PharmaLex: setting the standard**

With experts in Bayesian methodology, biomarker statistics, and CMC statistics, PharmaLex leads the charge in cutting-edge data-and-analytics. Backed by broad hands-on experience, our scientists conquer challenges in biopharmaceutical data with finesse.

## **Meet our team: a strategic fusion of expertise**

Join forces with a dynamic and multidisciplinary team of IT and data architects, (Bayesian) statisticians, data scientists, mathematicians, computational biologists, statistical geneticists, epidemiologists, cheminformaticians, bioengineers, pharmacists, and programmers. Our collective prowess spans pharmaceuticals, life sciences, MedTech, and Biotech industries, ensuring unparalleled expertise across diverse domains alongside the entire pharmaceutical value chain.

Experience the future of data-and-analytics excellence with PharmaLex. Let's shape a world where innovation knows no boundaries!

# Empower your pharmaceutical journey with comprehensive solutions

Unlock the potential of your pharmaceutical endeavors with our tailored suite of services, supporting each stage of your research, development, and market access journey.

## Research, discovery & pre-clinical

- Improve operational efficiency and foster collaboration through better data management and integration.
- Make educated decisions with advanced statistical modeling and visualizations, delivering robust drug candidates.
- Benefit from knowledge and first-hand experience of research data, processes, and system architectures in lab informatics, bioinformatics, omics, PK/PD, and more for unparalleled insights.

## Clinical development

- Access end-to-end clinical biometrics capabilities, from protocol support to phase I-IV study reporting.
- Propel drug development with innovative trial design and real-world data utilization.
- Harness biomarkers and real-world evidence (RWE) to support precision medicine and innovative therapies.

## Chemistry, manufacturing, and controls (CMC)

- Enhance efficiency and scientific understanding for safe medication development.
- Navigate evolving guidelines and complex molecules with expertise at every stage, from efficient data management, to development and regulatory compliance.
- Implement Quality by Design principles for optimized processes and analytical laboratories.

## RWE, market access and evidence generation

- Drive market access with statistical reporting and data management solutions.
- Integrate clinical statistics and market access needs for enhanced decision-making.
- Generate advanced evidence with innovative statistical methods to complement existing HEOR services.

## Data strategy & data governance

- Support regulatory compliance and enhance data quality with effective data strategy and governance.
- Digitally enable your processes and technologies for increased scientific productivity and reduced operational expenses.
- Accelerate innovation by improving data governance across people, processes, and technologies.

Experience the difference with our holistic approach to pharmaceutical solutions. Let us guide you towards success in today's dynamic healthcare landscape!
