

Sustain product revenues and margins

PharmaLex's Post-Launch Outsourcing services deliver cost-effective regulatory lifecycle maintenance of established products - from full portfolio to country-based outsourcing.

Growing regulatory complexity and mounting cost pressures in today's hyper-competitive global market mean companies can struggle to sustain post-launch product revenue streams. Increasingly, organizations of all sizes are strategically outsourcing the regulatory management of established product portfolios to stay competitive, flexible and innovative.

Our comprehensive Post-Launch Outsourcing regulatory services deliver established product portfolio maintenance support for large as well as small to mid-sized biopharmaceutical organizations. Harnessing our deep global-to-local market expertise, we help companies navigate regulatory complexities effectively and efficiently while implementing best practices to minimize regulatory risks and expand patient access and market reach.

With a strong track record of over 20 years of successful delivery, today PharmaLex is trusted by global biopharmaceutical organizations worldwide to implement, run and develop efficient and agile end-to-end regulatory outsourcing programs.

Our proven and flexible outsourcing model combines regulatory and scientific expertise with operational and technological capabilities to streamline maintenance operations for established products – freeing internal teams to focus on innovation and strategic growth opportunities.

Product lifecycle management from global-to-local regulatory experts

PharmaLex's deep domain expertise in post-approval regulatory requirements and lifecycle management delivers a complete product portfolio outsourcing solution for your business – from lead global headquarters to local affiliate activities.

Gain flexible and scalable regulatory capabilities

Our Post-Launch Outsourcing services support cost-effective, end-to-end management and market expansion of established product portfolios to maintain and improve revenue streams, while helping to control costs.
